---

[REDACTED]

As you requested yesterday, here is information we received since the August Cypress incident about an incident in May 2017 at the Clam Bay facility.

In contrast to the Cypress July and August incidents, Cooke did not report this incident to DNR at the time or since. I don't think it was reported to DFW or ECY at the time either but I could be wrong about that.

Since we did the Clam Bay structural inspection ourselves in September, we don't have to assume the facility is now stable.

Sean Carlson said you should feel free to contact [REDACTED] directly (her number is in one of the emails).

**Dennis Clark**

Assistant Division Manager  
Aquatic Resources Division, Orca-Straits District  
Washington State Department of Natural Resources (DNR)
